Benefits and Applications

Menthyl Lactate (98% minimum purity) is an effective (fused) coolant for use in both flavors and fragrances.

It imparts a very interesting and desirable cooling sensation in chewing gum, breath mints and candy. It is also used widely in oral care products, toothpaste, mouthwash and oral sprays to impart a clean, refreshing cooling sensation throughout the oral cavity.

SPECIFICATION

MENTHYL LACTATE

| Parameter | Specification |
|--------------|--------------------------|
| Appearance | White Crystalline Powder |
| Assay (GC) | 98% |
| Set Point °C | 42.0 min |
| Acid Value | 1 mg KOH/ gm max. |
